1.0 PURPOSE

This document provides details on the Design and Development process.

2.0 THEORY

The Company performs new product research and development (R&D). Controlling the design and development activity ensures that product designs meet all requirements and that parts produced are adequate as a result of the design.

3.0 DESIGN & DEVELOPMENT PROCEDURE

The responsible engineering authority (REA) for design and development is assigned by the Operations Manager. Design and development personnel from various business groups may include [REDACTED]

[REDACTED] Responsible Authorities authorize [REDACTED]

Design and development planning outputs specify critical items, which includes [REDACTED]

[REDACTED] Design and development planning outputs are recorded in the applicable Design Review or correspondence to the Customer and are controlled according to **QMS-02 Configuration Management Procedure**

The Company defines the data required to enable the product to be identified, manufactured, verified, used and maintained, which may include:

- [REDACTED]
- [REDACTED]
- [REDACTED]

Design and development planning takes into consideration the Company's ability to [REDACTED]

When applicable, the Company considers the potential consequences of [REDACTED]

When appropriate, the Company considers other information, such as [REDACTED]

When appropriate, the Company divides the design and development effort into [REDACTED]

When tests are necessary for verification and validation, these tests are planned, controlled, reviewed and documented to ensure and prove the following:
