1.0 Quality Control Manual (QCM)

The Company operates a quality management system to control:

1.1 Revision Control

The Quality Manager is responsible for making manual revisions and submits revisions to the Federal Aviation Administration (FAA) for review and acceptance. Revisions to the manual are distributed and made available to the FAA and electronic or manual systems. The Company does not incorporate changes to manual revisions that are unacceptable to the FAA or do not conform to applicable regulations. Maintenance and/or administrative actions performed under manual revisions that were found unacceptable to the FAA are corrected. The Company ensures that each manual holder or designated location receives each revision. Revisions to the manual are identified by a vertical bar in the margin or other suitable method to indicate the revised portion of text. This is accomplished by:

NOTE: An acknowledgement form may be used for tracking the receipt and insertion of the revision by the manual holder to ensure accountability. After receiving a revision, each manual holder should

be helpful in developing the procedures). The Company also describes the system for

4.2 Reporting Malfunctions or Defects

The Company notifies the FAA within 96 hours after discovering any failure, malfunction or defect of an article. This report is in a format acceptable to the FAA.

The repair stations may use FAA Form 8010-4, Malfunction or Defect Report. Information for completion of this form maybe found in AC 20-109, as amended. Examples of the types of information received on these reports may be found in AC 43-16, Aviation Maintenance Alerts, as amended. The Company may submit a Service Difficulty Report - Aeronautical Equipment, FAA Form 8070-1, for a certificate holder operating according to 14 CFR parts 121, 125 or 135 (information for completion of Form 8070 1 is attached to the form). The Company does not report

4.3 Continuity of Inspection Responsibility

The Company provides procedures for ensuring that the responsibilities of its inspectors are properly performed if they cannot complete the task. When the Company uses multiple shifts, the procedures ensure

4.4 Receiving Policy

The Company addresses the procedures used for accepting consumable materials and Customer parts. The Company generally describes how material is

Additionally, the procedure includes

4.4.1

Procedures include visual inspection of the container and contents for shipping damage, packing and proper paperwork. The Company provides procedures to assist receiving personnel in performing their tasks, such as

The procedure includes

4.4.2

Receiving personnel review paperwork received with articles maintained by other facilities contracted by the Company or parts received from foreign manufacturers (refer to AC 20-62, Eligibility, Quality and Identification of Aeronautical Replacement Parts, as amended).

The Company addresses

4.4,3

The Company describes how parts are stored and requisitioned for particular work.

V C N	REV	CAGE	DOC#:	8 of 21
Your Company Name	Orig		Repair Station Quality	Control Manual

The Company provides sufficient space to segregate articles and materials stocked for installation from those articles undergoing maintenance, preventive maintenance or alterations. Throughout the maintenance cycle, care is provided when

The Company provides for segregation and protection of parts, avoiding metal-to-metal contact contamination and preservation.

When the Company moves articles from one area of the facility to another it ensures

4.6 Tagging and Identification

All articles undergoing maintenance within the Company are identified using

Articles

awaiting repairs are identified differently than those that are repaired. Articles that are deemed non-repairable are

4.7 Incoming Inspection

The Company provides procedures that describe the incoming inspection of raw materials used by the Company for maintenance, preventive maintenance or alteration.

The Company defines what is considered raw material and describes how

The Company also includes procedures for handling suspected unapproved parts. Raw materials documentation or certifications are kept on file and the procedure addresses

4.11 Final Inspection

Final inspection is performed on each article before it is approved for return to service. Final inspection includes The Company develops a The individual checklist to ensure performing this inspection meets the requirements of section 145.155, which requires The person is able to understand, read and write English. As stated in section 145.213, except for individuals employed by a repair station located outside the United States, only an employee certificated under part 65 is authorized to This is accomplished by: a) b) c) d) e) f) g) h) i) **i**) k) 1) m) n) 4.12 Work Sign-Off Many repair stations use rubber stamps or electronic media instead of signatures to annotate the completion of a task on a traveler, work order, process sheet, inspection sheet, or similar document.

V. C. N.	REV	CAGE	DOC#:	12 of 21
Your Company Name	Orig		Repair Station Quality C	ontrol Manual

The intent of the stamp or electronic sign-off is to

The stamp or electronic sign-off used is often more legible than hand-written initials. When the Company chooses to use stamps or electronic media, it has a control program that addresses the following:

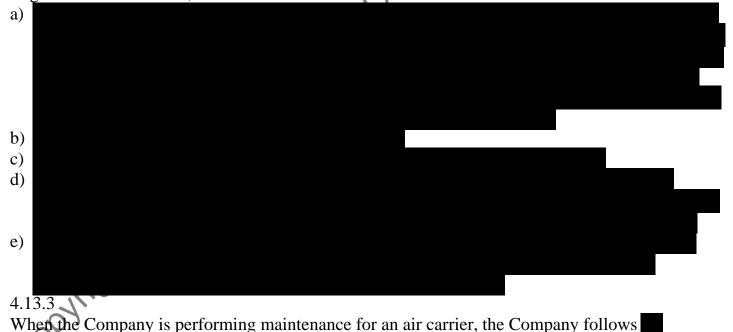

Exemptions from the regulations will no longer be required to use electronic media because the rule allows the use of electronic systems. The Company has procedures that fully describe the system and its use.

4.13 Maintenance Release and Approval for Return to Service

4.13.1

The maintenance release document meets the requirements of part 43, sections 43.9 and 43.11. The repair station that is Joint Aviation Authorities (JAA) certificated uses FAA Form 8130.3 as a maintenance release for articles returned to JAA member countries. 4.13.2

Regardless of the format, the contents includes:

4.13.4

The approval for return to service may be a separate document, included in the work order, or entered into the aircraft maintenance records. When the maintenance is a major repair, the

This is accomplished by:

9.0 Definition of Terms

a. Acceptable

Data is acceptable when it meets the requirements of the applicable regulations.

b. Accountable Manager

The person designated by the certificated repair station that is responsible for and has the authority over all Company operations that are conducted under part 145. This person's duties include ensuring that Company personnel follow the regulations and serving as the primary contact with the Federal Aviation Administration (FAA).

c. Approved

Approved by the Administrator unless used with reference to another person. Approval is granted to a repair station when the information, such as a process specification or rating, is listed on the operations specifications (OpSpecs).

d. Article

An aircraft, airframe, aircraft engine, propeller, appliance, or component part.

e. Contracting

Entering into an agreement between two or more persons for the performance of maintenance functions on an article.

f. Correction

An action taken to eliminate a detected nonconformity. For repair stations electing to use an International Organization for Standardization (ISO 9001) quality system, a correction may involve repair or rework and may be made in conjunction with a corrective action.

Voya Commony Nome	REV	CAGE	DOC#:	19 of 21
Your Company Name	Orig		Repair Station Quality	Control Manual

g. Corrective Action

An action taken to eliminate the cause of a detected nonconformity or other undesirable condition to prevent its reoccurrence. For repair stations electing to use an ISO 9001 or similar system, the undesirable condition may include potential regulatory violations, which differs from a nonconformity requiring correction.

h. Designated Engineering Representative (DER)

A private person designated by the FAA Administrator to act as its representative for examining, inspecting, and testing aircraft and related data. A DER may recommend approval or approve data within the limitations of his or her certificate of authority.

i. Directly in Charge

Responsible for the work of a certificated repair station that performs maintenance, preventive maintenance, alterations, or other functions affecting aircraft airworthiness. A person directly in charge doesn't need to physically observe and direct each worker constantly, but must be available for consultation on matters requiring instruction or decision from higher authority.

- j. Line Maintenance
- (1) Any unscheduled maintenance resulting from unforeseen events; or
- (2) Scheduled checks that contain servicing and/or inspections that do not require specialized training, equipment, or facilities.

k. Maintenance

Inspection, overhaul, repair, preservation and the replacement of parts, excluding preventive maintenance.

1. Maintenance Function

A step or series of steps in the process of performing maintenance, preventative maintenance, or alterations, which result in approving an article for return to service.

m. Major Alteration

An alteration not listed in the aircraft, aircraft engine, or propeller specifications that:

- (1) Might appreciably affect weight, balance, structural strength, performance, power plant operation, flight characteristics, or other qualities affecting airworthiness; or
- (2) Is not done according to accepted practices or cannot be done by elementary operations.

n. Major Repair

A repair that:

- (1) If improperly done, might appreciably affect weight, balance, structural strength, performance, power plant operation, flight characteristics, or other qualities affecting airworthness; or
- (2) Is not done according to accepted practices or cannot be done by elementary operations.

o. Operations Specifications (OpSpecs)

The official document that describes the authorizations, ratings and limitations of the repair station.

p. Preventive Action

An action taken to eliminate the cause of a potential nonconformity or other potentially undesirable situation. For repair stations electing to use an ISO 9000 system, preventative action is taken to prevent an occurrence, whereas corrective action is taken to prevent a reoccurrence. For a repair

V. C. N.	REV	CAGE	DOC#:	20 of 21
Your Company Name	Orig		Repair Station Quality	Control Manual

station using an American Society for Quality (ASQ) system, preventative action is taken to remove or improve a process to prevent potential future occurrences of a nonconformance.

q. Preventive Maintenance

Simple or minor preservation operations and the replacement of small standard parts not involving complex assembly operations.

r. Procedure

A specified way to perform an activity or a series of steps, such as a procedure that describes the methods, steps, or means to carry out policy

s. Quality Control Manual (QCM)

A manual that describes the inspection and quality control procedures used by the repair

t. Rating

A statement that, as a part of the repair station's certificate, describes the special conditions, privileges, or limitations issued under part 145, sections 145.59 and/or 145.61

u. Repair Station Manual (RSM)

A manual that describes the procedures and policies of a repair station's operations.

v. Required Inspection Item (RII)

An item of maintenance that, if not performed properly or if improper parts or materials are used, could result in a failure, malfunction, or defect, endangering the safe operation of the aircraft. An RII must be inspected by a trained, qualified and authorized inspector.

The inspector must be listed on the repair station's roster but can't be the same individual who performed the work. (See parts 121, 125 and 135, sections 121.371, 125.251 and 135.429 for details of this requirement).

w. Supervisor

A person who directs the work performed under the repair station's certificate and OpSpecs. (See part 145, section 145.153 for supervisory personnel requirements.) COPYIIONICO JAIR COPYIIONICO

Your Company		REV	CAGE	DOC#: 18 of 2

This document may not be disclosed or reproduced in whole or in part without prior written permission from a representative of the Company with the authority to grant

The Company addresses guidelines and requirements for electronic signatures according to AC 120-78 and provides a copy of the procedures for implementing an electronic recordkeeping system to the CHDO.

This is accomplished by:

11.0 Definition of Terms

a. Acceptable

Data is acceptable when it meets the requirements of the applicable regulations.

b. Accountable Manager

The person designated by the certificated Company who is responsible for and has the authority over all Company operations that are conducted under part 145. This person's duties include ensuring that Company personnel follow the regulations and serving as the primary contact with the Federal Aviation Administration (FAA).

c. Approved

Approved by the Administrator unless used with reference to another person. Approval is granted to a Company when the information, such as a process specification or rating, is listed on the operations specifications (OpSpecs).

d. Article

An aircraft, airframe, aircraft engine, propeller, appliance, or component part.

e. Contracting

Voya Commony Nome	REV	CAGE	DOC#:	19 of 21
Your Company Name	Orig		Repair Station	on Manual

This document may not be disclosed or reproduced in whole or in part without prior written permission from a representative of the Company with the authority to grant such permission.

Entering into an agreement between the originating certificated Company and another person or people to perform maintenance functions on an article. The originating Company exercises the privileges of its certificate and assumes responsibility for the work performed by the contracted person(s).

f. Correction

An action taken to eliminate a detected nonconformity. For Companies electing to use an International Organization for Standardization (ISO 9001) quality system, a correction may involve repair or rework and may be made in conjunction with a corrective action.

g. Corrective Action

An action taken to eliminate the cause of a detected nonconformity or other undesirable condition to prevent its reoccurrence. For Companies electing to use an ISO 9001 or similar system, the undesirable condition may include potential regulatory violations, which differs from a nonconformity requiring correction.

h. Designated Engineering Representative (DER)

A private person designated by the FAA Administrator to act as its representative for examining, inspecting, and testing aircraft and related data. A DER may recommend approval or approve data within the limitations of his or her certificate of authority.

i. Directly in Charge

Responsible for the work of a certificated Company that performs maintenance, preventive maintenance, alterations, or other functions affecting aircraft airworthiness. A person directly in charge doesn't need to physically observe and direct each worker constantly, but must be available for consultation on matters requiring instruction or decision from higher authority.

- j. Line Maintenance
- (1) Any unscheduled maintenance resulting from unforeseen events; or
- (2) Scheduled checks that contain servicing and/or inspections that do not require specialized training, equipment, or facilities.

k. Maintenance

Inspection, overhaul, repair, preservation, and the replacement of parts, excluding preventive maintenance.

1. Maintenance Function

A step or series of steps in the process of performing maintenance, preventative maintenance, or alterations, which result in approving an article for return to service.

m. Major Alteration

An alteration not listed in the aircraft, aircraft engine, or propeller specifications that:

- (1) Might appreciably affect weight, balance, structural strength, performance, power plant operation, flight characteristics, or other qualities affecting airworthiness; or
- (2) Is not done according to accepted practices or cannot be done by elementary operations.

Copyright © JnF Specialties, LLC. All rights reserved worldwide. www.quality-control-plan.com/copyright.htm

Voya Commony Nome	REV	CAGE	DOC#:	20 of 21
Your Company Name	Orig		Repair Station Ma	anual

This document may not be disclosed or reproduced in whole or in part without prior written permission from a representative of the Company with the authority to grant

n. Major Repair

A repair that:

- (1) If improperly done, might appreciably affect weight, balance, structural strength, performance, power plant operation, flight characteristics, or other qualities affecting airworthiness; or
- (2) Is not done according to accepted practices or cannot be done by elementary operations.
- o. Operations Specifications (OpSpecs)

The official document that describes the authorizations, ratings, and limitations of the Company.

p. Preventive Action

An action taken to eliminate the cause of a potential nonconformity or other potentially undesirable situation. For Companies electing to use an ISO 9001 system, preventive action is taken to prevent an occurrence, whereas corrective action is taken to prevent a reoccurrence. For a Company using an American Society for Quality (ASQ) system, preventive action is taken to remove or improve a process to prevent potential future occurrences of a nonconformance.

g. Preventive Maintenance

Simple or minor preservation operations and the replacement of small standard parts not involving complex assembly operations.

r. Procedure

A specified way to perform an activity or a series of steps, such as a procedure that describes the methods, steps, or means to carry out policy.

s. Quality Control Manual (QCM)

A manual that describes the inspection and quality control procedures used by the Company.

t. Rating

A statement that, as a part of the Company's certificate, describes the special conditions, privileges, or limitations issued under part 145, sections 145.59 and/or 145.61.

u. The Company Repair Station Manual (RSM)

A manual that describes the procedures and policies of a Company's operations.

v. Required Inspection Item (RII)

An item of maintenance that, if not performed properly or if improper parts or materials are used, could result in a failure, malfunction, or defect, endangering the safe operation of the aircraft. An RII must be inspected by a trained, qualified, and authorized inspector. The inspector must be listed on the Company's roster but can't be the same individual who performed the work. (See parts 121, 125, and 135, sections 121.371, 125.251 and 135.429 for

details of this requirement).

w. Supervisor

A person who directs the work performed under the Company's certificate and OpSpecs and is available in person at the Company when work is being performed. See 145.153 for supervisory personnel requirements.

INTRODUCTION TO TRAINING PROGRAM

This training program document contains the policies and procedures (Your Co) uses to determine its training requirements and to develop its training program. The training program ensures each repair station employee has the knowledge and skills to capably perform assigned maintenance, preventive maintenance and alteration tasks. The contents in this manual ensure (Your Co) can respond to its employee's changing training needs. This manual sets forth the procedures for (Your Co) to identify its training needs in a systematic manner, develop training and/or identify appropriate existing training, select the training methods, provide training, record training accomplishment and measure the effectiveness of its training program. (Your Co) controls this document according to the procedures for document control described in its Repair Station Manual (RSM) and (Your Doc). A copy of this document and all revisions are provided to Your Co)'s Certificate-Holding District Office (CHDO). The procedures for revising this document and submitting revisions to the FAA for approval are described in this document and in (Your Co) RSM. (Your Co) uses a closed loop system to ensure that the training requirements for (Your Co) and employees are identified, training standards are established, training is provided and the training program is revised as necessary.

(Your Co)'s training program consists of the following basic components:

•	
•	
•	
•	
•	
Th	ne Quality Assurance Manager is responsible for

SECTION 1. BACKGROUND

Persons performing fabrication, maintenance (including inspections), preventive maintenance and alteration must be assessed and trained according to the Federal Aviation Administration (FAA) approved procedures set forth in this manual. All other employees may be trained according to the approved procedures of this manual at management discretion. (Your Co) has an established training program that includes
