## TABLE OF CONTENTS

**1.0 Scope .....3**

**2.0 Guidelines .....3**

**3.0 Equipment .....3**

**4.0 Materials.....3**

**5.0 Requirements .....3**

    5.1 *Base Metal Cleanliness*..... 3

    5.2 *Component Cleanliness* ..... 3

    5.3 *Welding Machines*..... 3

    5.4 *Fitup*..... 4

    5.5 *Jigs and Fixtures*..... 4

    5.6 *Machine Qualification* ..... 4

    5.7 *Control Adjustments* ..... 4

    5.8 *Test vs. Production Conditions* ..... 4

    5.9 *Weld Acceptance Criteria*..... 4

    5.10 *Test Frequency (Item 1, 2, and 3 apply)* ..... 5

    6.0 *Definitions*..... 5

    6.1 *Peel Test*..... 5

    6.2 *Shear Test* ..... 5

    6.3 *Member*..... 5

**7.0 Workmanship .....5**

Your Co	REV	CAGE	DOC#:	Your #	2 of 2
---------	-----	------	-------	--------	--------

**1.0 Scope**

Provide a standard for achieving uniform resistance spotwelds.

**2.0 Guidelines**

- 2.1 AWS A3.0, Standard Welding Terms and Definitions
- 2.2 Your #, Your Doc
- 2.3 Your #, Spotwelding Log or equivalent
- 2.4 Your #, Workmanship Standards
- 2.5 AMS-W-6858, Welding, Resistance, Spot and Seam

**3.0 Equipment**

- 3.1 Non-magnetic Jigs or Fixtures
- 3.2 Spotwelding equipment of sufficient capacity to achieve the required workmanship standards

**4.0 Materials**

- 4.1 Alcohol, 99% Anhydrous
- 4.2 Clean Cloth or Towel

**5.0 Requirements**

**5.1 Base Metal Cleanliness**

Material to be spotwelded must meet the applicable workmanship standard (Your #).

**5.2 Component Cleanliness**

Items may be used if they appear [redacted]  
 [redacted] The surface to be  
 welded must [redacted]  
 [redacted]

**5.3 Welding Machines**

The welding machine(s) must consist of a suitable source of electrical energy, means of  
 adequately cooling the electrodes, and a means of [redacted]  
 [redacted] It must  
 not be possible to [redacted]  
 [redacted]

Your Co	REV	CAGE	DOC#:	Your #	3 of 3
---------	-----	------	-------	--------	--------

### **5.4 Fitup**

Mating parts assembled for welding must be designed and processed to fit so that before the first and each successive weld is made the surfaces to be joined by the weld are [REDACTED]

### **5.5 Jigs and Fixtures**

All tooling that is required to locate welds or assist in the assembly of welded parts that passes through the magnetic field during the welding operation must [REDACTED]

### **5.6 Machine Qualification**

Daily tests must be conducted according to 5.10 or according to the applicable manufacturing procedure to determine if [REDACTED]

### **5.7 Control Adjustments**

When adjustment of the daily qualification weld schedule is desirable, the settings may be varied by [REDACTED] from the qualified values, or by [REDACTED] when only one qualified setting is adjusted. Production welds must be made within [REDACTED] of the settings used on qualification test specimens. If satisfactory welding cannot be maintained within these limits of adjustment, welding [REDACTED]

### **5.8 Test vs. Production Conditions**

Results of tests must represent production parts. The welding conditions should be replicated in parts and materials used for weld tests. For example, [REDACTED]

### **5.9 Weld Acceptance Criteria**

**Test and production welds:**

Delamination of or expulsion of any base material is [REDACTED]

### **Peel Test Requirements:**

Your #

Your Co	REV	CAGE	DOC#:	Your #	4 of 4
---------	-----	------	-------	--------	--------

**Pull Test Requirements:**

Your #

**5.10 Test Frequency (Item 1, 2, and 3 apply)**

- 1.) [Redacted]
- 2.) [Redacted]
- 3.) [Redacted]

**6.0 Definitions**

**6.1 Peel Test**

A mechanical test in which the members are gripped and pulled apart perpendicular to each other to determine [Redacted]

**6.2 Shear Test**

A mechanical test in which the members are gripped and pulled apart in parallel to each other to determine [Redacted]

**6.3 Member**

Individual items to be joined in a welding process.

**7.0 Workmanship**

The quality of the welded assembly is determined according to [Redacted]
